London, RM3

Personal profile

Developed a trouble shooting program and a webpage in my computer science GCSE's acquiring basic python, HTML and JavaScript programming skills. Showing I am a quick learner, well organised, versatile and a problem solver. Manufacturing a gadget tidy attached to a docking station also portrays my ability to design uniquely and create prestigious projects. My enthusiasm in creating led me to a commitment to careers in engineering.

Work experience

Nov 2017 - Present

Thursdays Voluntary Teaching - Pyrgo Primary School

I help year 6 pupils with there maths skills helping them practise the maths they learn in school and challenging them with difficult questions. It improves my planning, organisation, teaching and communication.

Jun 2012 - Jul 2012

Eco Intership - WWF

I was part of a 5 day Eco internship program that lasted 3 hours each day with the World Wide Fund For Nature. The program was designed to make me aware of my civil duties. By making a presentation of an alarming threat (land fill sites) to the environment myself and my team was able to pass the internship and acquire an years membership with WWF. This helped me develop my leadership, communication and showed how i was able to manage projects and display them in an efficient. I was also able to communicate with people effected by the land fills in a positive behavior and was able to convey there message and problems to an unaware audience in my school to try and become a voice for the people who couldn't help themselves.

Education

Sep 2015 - Jun 2017

GCSE's - Drapers' Academy

A 9 in Maths, A*'s in Graphic products, Resistant Materials and Physics, distictions in ECDL and English Speaking, A's in Statistics, Computer Science, Biology, Chemistry and Urdu, and a 6 in English Language.

Other interests

Mar 2017 - Present

School House Council

I was chosen by my peers to represent them in the school house council, a representative from each house and grade in the school sits together and talks about how to improve school life. This helps me improve my communication skills and try making a difference.

Jan 2017 - Present

DofE

I also earned a bronze medal in Duke of Edinburgh this involved an expedition and a presentation. Helping me improve my navigation, teamwork, communication, presentation and outdoor skills. Currently i am working on getting the silver medal for DofE as well.

Sep 2016 - Jun 2017

School Prefect

I was chosen by my school staff to help them on school events for example showing parents around and guiding them on open evenings. This again helped me improve my communication skills and also enhanced my management skills.

Jan 2016 - Apr 2017

Badminton team

I had to play single and double matches for my school, it enhanced my time management amd improved my coordination skills when working as a team.

Jan 2016 - Mar 2016

Basketball

I played basket ball in a school club developing my coordination and communication with the team.

Jan 2016 - Mar 2016

Volunteering in a library

I had to help the Library Assistant manage the library and help juniours with there studies. It enhanced my time management again between the volunteering work and my own studies, it also taught me patience and helped me be more organised.

Jan 2011 - Feb 2011

Roots Science Expo

In my previous school I created a rowing boat out of recycled bottles that was full scale to seat 2 people in it for my science expo and even achieved third place for my project. It helped me improve my time mangement and problem solving skills.

Jan 2011 - Feb 2011

Roots Science Expo

I also enlisted another project with a scaled down model of a 21st century home with motion, heat, light, sound and water sensors in it which controlled the lights. I was awarded second place. The project improved my soldering, wood working and presenting skills.
